

[Cures Within Reach](#) (CWR), a leading non-profit in repurposing research, recently launched **two new Requests for Proposals for Meniere's disease, with up to \$100,000 for repurposing clinical trials and up to \$50,000 for preclinical repurposing research.** These RFPs will support research that repurposes approved drugs, devices, nutraceuticals and diagnostics to drive treatments to Meniere's disease patients. **Initial proposal submissions are due by March 20, 2020.** The top-scored proposals will be invited to submit full grants.

**To submit a project or view the RFPs, register as a Researcher or Clinician on our CureAccelerator repurposing platform at <https://app.cureaccelerator.org/registration>. View any of our open RFPs at <http://bit.ly/cwrrfps>.**

CWR is also looking for Meniere's disease professionals to serve as grant reviewers for these opportunities. Please share this announcement with your Meniere's network and help us spread the word!

CWR is a global nonprofit that leverages the speed, safety and cost-effectiveness of medical repurposing research, and we are building a research pipeline that could lead to clinical breakthroughs in Meniere's disease. If you have a repurposing idea in Meniere's disease that isn't an exact fit for the RFPs, or if you have any eligibility questions, please **contact Clare Thibodeaux, PhD at [clare@cureswithinreach.org](mailto:clare@cureswithinreach.org)** to discuss fit and/or submission options.
