

Neurotologist—Mayfield Clinic, Cincinnati, Ohio

[Relocation Assistance](#) | [Independent Practice](#) | [Research/Publication Assistance](#) | [Shareholder Opportunity](#)

Mayfield Clinic, a large, physician-owned, independent neurosurgery practice based in Cincinnati, Ohio, is currently in search of a neurotologist.

The ideal candidate will be fellowship trained in Neurotology and board eligible/board certified with an interest in program development and leading the clinic's otology practice and collaborating with a nationally known team of brain tumor surgeons. As the predominant provider of neurooncological surgical services in the region, multi-disciplinary collaboration with a city-wide team of subspecialists and direct collaboration with Mayfield's skull base neurosurgical team will be a primary focus of this role. There is opportunity to develop an outpatient surgical practice within our physician-owned surgery center. A great bedside manner and excellent interpersonal communication skills are essential for a successful partnership with the other neurosurgeons in our practice. Mayfield values collaboration amongst its partners and focuses on maintaining consistently excellent outcomes.

As Greater Cincinnati's premier neurosurgical practice, Mayfield providers treat over 25,000 patients each year. Mayfield is committed to being a destination for neurosurgical services and aligning subspecialty partners as we expand.

Mayfield is an equal opportunity employer.

Submit your CV and cover letter (optional) for immediate consideration to Lindsay Finton, Manager of Business Development, at lfinton@mayfieldclinic.com.

About Mayfield Clinic

Mayfield Clinic is a large independent neurosurgery practice based in Cincinnati, Ohio with four offices located across Greater Cincinnati and Northern Kentucky. Founded in 1937 by Frank H. Mayfield, MD, the practice has grown to include 21 neurosurgeons, five PM&R or interventional pain physicians, and 18 advanced practice providers, as well as full service physical therapy services at all four locations. Mayfield also operates a free-standing outpatient spine surgery center and pain procedure suites.

Mayfield Brain & Spine is the full-service patient care provider of the Mayfield Clinic, one of the nation's leading physician organizations for neurosurgical treatment, education, and research.

The Mayfield Education and Research Foundation supports the research and publication services of our physicians, as well as a surgical innovation center, which hosts training labs and new technology development programs.

Mayfield works collaboratively with four health systems across the Greater Cincinnati and Northern Kentucky market providing minimally invasive and complex spine surgery, as well as non-surgical spine care, neurovascular, brain tumor, Chiari Malformation, and neurofunctional care for our patients, who come to us from across the United States and several countries each year.
